

Mission Control security packet

Lozort Federal LLC | Trust page updated Oct 22, 2026

Small contractors get asked about security in every teaming agreement and questionnaire. This is the honest answer, with where each claim comes from. Nothing here is a certification. If something is wrong, email contact@lozortfederal.com.

In place (5)

Built and checked in the product today

[x] Every firm is walled off. Each firm record carries your firm id, and the database refuses reads and writes across firms (Postgres row-level security).

Verified in code, migrations 0001 to 0062

[x] Encrypted in transit and at rest. Every browser and API connection uses TLS. Stored data is encrypted at rest by our database and hosting providers.

Supabase and Vercel, see sub-processors

[x] Key actions are logged. Who did what and when, for team changes, proposals, statements, teaming, compliance and firm profile edits. Owners and admins can read the log and export it.

Admin, Audit log

[x] AI drafts show their sources. Drafts are written from the notice, your firm profile and your files, and cite them. Nothing replaces your text until a person accepts it.

Proposal editor, Capability statements

[x] Your own AI key. AI drafting runs on your firm's own Anthropic key, billed to you by Anthropic. The key is stored encrypted and is never shown again.

Settings, AI keys

In progress (2)

Started, with what is left

[~] Two-step sign-in. Available to every member now. Required for owners and admins once we switch enforcement on.

Rolling out, Settings, Security

[~] SOC 2. Not yet audited. We will say so plainly until a report exists.

Decision pending

Not claimed (4)

So nobody assumes otherwise

[] Independent penetration test. Not done yet. When one is done we will publish a summary here.

Status as of Oct 2026

[] FedRAMP authorization. Mission Control is not FedRAMP authorized.

Status as of Oct 2026

[] Approved for CUI. Do not upload Controlled Unclassified Information or classified material. Keep CUI in a system that meets DFARS 252.204-7012.

Applies to every plan

[] **Certifying your firm.** We help you track and evidence CMMC, SAM and certifications. We do not certify or assess your firm.
Compliance

Sub-processors

Everyone who receives data from the product, taken from what the code calls. Beltway, our accounting product, runs as a separate service with its own list.

Services that process your data

Supabase. Database, sign-in and file storage. Receives: Your firm's records and uploaded files, and the email addresses of people who sign in.

Vercel. Hosting and page-view analytics. Receives: Page requests and page-view counts.

Stripe. Payments and subscriptions. Receives: Billing contact and plan. Card details go straight to Stripe and never touch our servers.

Resend. Email delivery for invites, alerts and digests. Receives: The recipient's email address and the message.

Anthropic. AI drafting, only when your firm adds its own API key. Receives: The prompt and the excerpts of the notice, profile and files used for that draft, under your firm's own Anthropic account.

Embeddings service run by Lozort Federal. Turns text from your uploaded files into search vectors, so drafts can find the right passage. Receives: Text from your uploaded files. Its address is set at deploy time.

Public data we read

SAM.gov. Federal opportunities and entity registration. Receives: Search terms and public registration numbers only. No firm records or files.

USASpending.gov. Public award history for recompetete radar. Receives: Search terms only. No firm records or files.

Texas SmartBuy (ESBD). Texas state and local bid notices. Receives: Notice ids only. No firm records or files.

Loaded in your browser

Microsoft Office.js. The script that lets the Word add-in run inside Word. Receives: Your browser requests the script when you open the add-in. We send it nothing.

Google Fonts. Some of our emails ask for a web font. Receives: The reader's mail app requests the font when the email is opened. We send it nothing.

Sources for the encryption statements are the providers' own published pages, listed in docs/TRUST-SOURCES.md in the product repository: supabase.com/security and vercel.com/docs/security/compliance.
